The Origins of AP Psychology Memes

Understanding the origins of AP Psychology memes gives insight into their popularity. The rise of internet culture, particularly on platforms like Instagram, Twitter, and Reddit, has

played a significant role in the proliferation of these memes. They often emerge from students' collective experiences and frustrations with the AP curriculum.

Initially, memes in general were largely based on pop culture references, but as educational content became more prevalent online, students began creating memes specifically about their academic subjects. Psychology, with its rich array of theories and concepts, provided fertile ground for meme creation. Students began to share their own creations, leading to a viral trend that has now become a staple in the AP Psychology community.
