Program Structure and Curriculum

The GMU psychology graduate program is designed to provide students with a strong foundation in psychological theory and research while allowing flexibility for individual interests. The program offers both master's and doctoral degrees, each with its own set of requirements and curriculum components.

Master's Degree in Psychology

The master's program typically requires students to complete around 30-36 credits, depending on the concentration chosen. Core courses generally cover essential topics such as:

- Research Methods in Psychology

- Statistical Methods
- Theories of Personality
- Psychological Assessment
- Ethics in Psychology

In addition to core courses, students can choose electives that align with their interests, such as child psychology, health psychology, or organizational psychology. The program usually culminates in a capstone project or thesis, allowing students to apply their knowledge in a practical setting.

Doctoral Degree in Psychology

The doctoral program is more extensive, requiring a minimum of 60 credits. This degree usually involves a combination of coursework, research, and practical experience. Students are expected to engage in advanced studies, which include:

- Advanced Research Design
- Multivariate Statistics
- Advanced Topics in Psychology
- Dissertation Research

Doctoral students also complete a supervised internship, which is crucial for gaining hands-on experience in a professional environment. The dissertation process encourages original research that contributes to the field of psychology.

Admission Requirements

Gaining admission to the GMU psychology graduate program is competitive, and applicants must meet specific criteria to be considered.

General Admission Criteria

The following are common requirements for admission:

- A completed application form

- A bachelor's degree from an accredited institution
- A minimum GPA (typically 3.0 or higher)
- Official transcripts from all post-secondary institutions
- Letters of recommendation (usually two or three)
- A personal statement outlining academic and professional goals
- Relevant test scores (e.g., GRE, if required)

The personal statement is particularly important as it allows applicants to showcase their passion for psychology and explain why they are a good fit for the program.

International Students

International applicants may have additional requirements, such as proof of English proficiency through tests like the TOEFL or IELTS. It is essential for these applicants to review specific guidelines set by GMU for international admissions.

Areas of Specialization

One of the significant advantages of the GMU psychology graduate program is the variety of specializations available. Students can tailor their education to align with their career aspirations.

Clinical Psychology

The clinical psychology track is designed for students who wish to pursue licensure as psychologists. This specialization focuses on diagnosing and treating psychological disorders, incorporating both theoretical knowledge and practical skills.

Developmental Psychology

Students interested in the psychological growth and development across the lifespan may choose the developmental psychology specialization. This area examines how individuals change and develop from infancy through old age.

Social Psychology

The social psychology track delves into how individuals interact with others and the influence of social contexts on behavior. This specialization is ideal for students interested in research areas like group dynamics, social perception, and interpersonal relationships.
